Abstract

A graph is 1-planar if it can be drawn on the plane so that each edge is crossed by at most one other edge. In this paper, it is proved that every 1-planar graph with maximum degree $\Delta \geq 8$ is edge-colorable with $\Delta$ colors if each of its 5-cycles contains at most one chord.

Keywords: 1-planar graphs, edge coloring, discharging method.

2010 Mathematics Subject Classification: 05C15.
