

NOTE

ALMOST SELF-COMPLEMENTARY UNIFORM HYPERGRAPHS¹

Abstract

A k -uniform hypergraph (k -hypergraph) is *almost self-complementary* if it is isomorphic with its complement in the complete k -uniform hypergraph minus one edge. We prove that an almost self-complementary k -hypergraph of order n exists if and only if $\binom{n}{k}$ is odd.

Keywords: uniform hypergraph.

2010 Mathematics Subject Classification: 035C.

¹The research was partially sponsored by the Polish Ministry of Science and Higher Education.
